### General (Important)

- Please remove your developer's name for the stylesheet and add "SEMGees" instead (please do this going forward on all projects)

### Fonts (Important)

- Please take another look at fonts throughout the website. I just looked at the homepage and already found a few issues with size, letter spacing, and font family:
  - E.g. Slider subheader looks too small..see [here](#)
  - Wrong font [here](#)
  - Headings in page banners, etc.

### Header

- Hover effect on nav links "About" "Why" "Charities"
  - Please only have as a link hover effect, no button
  - Make white words become Blue (primary): #4d6081 upon hover
- Sign Up CTA
  - Add Blue (primary) #4d6081 hover effect button background
- On max-width: 991px please add margin-left: 49px on the .custom-logo class
- On mobile, the close X icon should be right on top of the menu icon so you don't have to move your finger

### Footer

- Talk to Us links should be Text Transform: Uppercase...see [here](#)
- On MacBook (1280px) the social links move to a second line...see [here](#)
- Input boxes in newsletter are too wide...see [here](#)
- Need to replace current sign up form with the below MailChimp form:

```
<!-- Begin MailChimp Signup Form -->

style="display:none"></div>
        </div> <!-- real people should not fill this in and expect good things - do not

embedded-subscribe" class="button"></div>
</div>
</form>
</div>

<!--End mc_embed_signup-->

```

- On mobile, footer needs to be cleaned up to match the mobile design better

## Homepage

- The first slider image is wrong. See [here](#)
- I disabled Instagram for now as we need to show the client the demo soon
- Video popup is very messy..see [here](#).

## Menu Page

- Can you add the items [here](#) to the site? e.g. copy and paste into the appropriate sections
- This page should be called “Menu” with no s and the url should not have an s in it
- The menu blocks are in the wrong order...e.g. Tacos should be first, Burritos second, Tsunami third, etc.
- On Mobile, the plus icons are misaligned (too far to the top)

## Locations Page

- Is there any way to get the Locations grid to look more like the design, e.g. with Belmar first, Jackson second, Lacey third, etc... (from left to right)
- The sizing of many of the blocks is different than the design as well

## Individual Locations Pages

- The thumbnails should all be the same height on all of these pages....e.g. 450px tall. You might have to define a new thumbnail size in functions.php and crop it so you can display

## Catering Page

- Few issues with the form [here](#)
- Font issues in sidebar [here](#)
- The arrows in the bottom slider do not match the design...see [here](#)
- The bottom slider should be shorter...try **height: calc(100vh - 116px)**

## ST TV

- No issues

## ST CARES

- This should be like this in the menu: ST C.A.R.E.S. (notice the periods)
- If we add more images to the gallery will they be AJAXED in when you click on the arrow?

## About

- On mobile, the paragraphs are not in the right spot. It should go Image > Paragraph, Image > Paragraph, etc. Right now they are not in the right spot.

## Apply

- State and Zip code fields should be smaller to match the design...see [here](#)

## Gift Cards

- How do I add the client's PayPal details?
